Remarks:

1. A maximum deposit amount is set by the Bank of Thailand.
2. Converting one currency into another currency as prescribed above shall be calculated based on exchange rates, conditions and procedures set by the bank with reference to Reuter's pricing.
3. A monthly average balance is calculated by summing daily balances and dividing the total by the number of days in that month.

Example: Balance during March 1st and March 15th = USD100

Balance during March 16th and March 31st = USD250

Average deposit balance in March = $\frac{(USD100 \times 15 \text{ days}) + (USD250 \times 16 \text{ days})}{31 \text{ days}}$

Average = USD177.41
